Full Stack Software Engineer - Remote (f/m/x)

Freelancer, Full-time · Remote

YOUR MISSION

You actively shape your position, we want you to get involved and contribute ideas!

- Work in a cross-functional team, combining your expertise with your team members to ensure rapid feature development, highest automation, and a great product.

- Tackle challenges holistically, contributing to backend and frontend development based on your strengths.

Backend Development:

- Implement API development best practices, with a preference for familiarity with GraphQL.

- Integrate and consume REST APIs for back-end communication.

- Collaborate with UX and UI design specialists to ensure back-end solutions support innovative and user-oriented ideas.

- Utilize Docker, and Kubernetes for containerization and orchestration is a plus.

- Ensure efficient back-end processes and distributed systems.

Frontend Development:

- Implement innovative ideas and user-oriented solutions with UX and UI design specialists.

- Utilize and enhance skills in CSS, JavaScript, and TypeScript.

- Develop and maintain applications using Vue or Nuxt and at least one responsive framework (e.g., Tailwind).

- Ensure seamless integration with REST and GraphQL APIs for front-end communication.

YOUR PROFILE

- You have 5+ years experience as a software engineer, with a focus on full-stack development.

- Bachelor's degree in a STEM field (preferred) or equivalent bootcamp experience with a minimum of 5 years of professional experience.

- Interest in tackling challenges holistically and extending expertise across both backend and frontend.

- Strong problem-solving skills and attention to detail.

- Stronger expertise in either backend or frontend development, with a willingness to work across the full stack.

- Good communication skills in English and the ability to work in a collaborative environment.

Backend Skills:

- Proficiency in API development and integration, ideally with GraphQL.

- Fluent in Python, experience in Go is a plus

- Practical understanding of distributed systems.

- Experience with Docker and Kubernetes (nice to have).

Frontend Skills:

- Proficiency in CSS, JavaScript and TypeScript.

- Experience with Vue or Nuxt and at least one responsive framework (e.g., Tailwind).

WHY US?

- **Work-Life Balance:** 30 days of paid vacation.

- **Professional Development:** Annual education budget of €1,500.

- **Workation Opportunities:** Combine work and vacation annually.

- **Diversity:** Join an international team with diverse cultural backgrounds.

Please note: This is a fully remote position, but requires working within a German or European time zone to ensure smooth collaboration with the team.
